

Calkins Chisel Plow Spring mount chisel shanks with tandem walking beam.

The 32" spring mount chisel shank provides for maximum ground to frame clearance. The chisel plow also can be ordered with a solid shank mount for a positive hold.

Tandem walking beam axles provide better flotation and depth control in uneven ground contours. Also, tandem walking wheels support more weight and add stability in the road transport position. The chisel plow uses tapered wheel bearings for high load capacities.

Features:

- Adjustable spring shanks
- Heavy duty tandem wheel legs
- Widths to 37 Ft

PRODUCT SPECIFICATIONS:

- Sizes: 8' - 37'
- Shank spacing: 12"
- Center section: 8' and 11'
- Wings: 6' and 9'
- Wing extensions: 2, 4 and 6 shank
- Frame tubing: 6" x 6" tubing with 1/4" wall
- Tongue: Heavy reinforced 6" x 4" x 3/8" wall tubing
- 32" shank material: 1 1/4" x 2" steel
