LOVE 816SL VACUUM SOWER

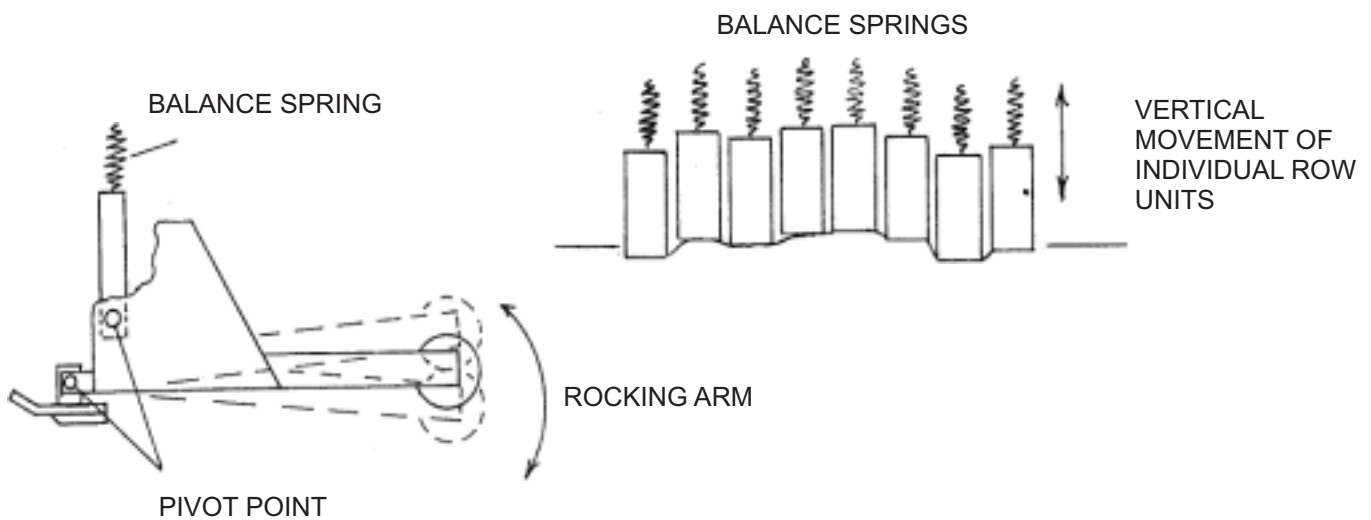

A complete vacuum sower consists of three point hitch semi-mounted frame, PTO driven vacuum pump, guage/drive wheels, and individually suspended sowing row units comprise of seed metering drums, furrow openers and packer wheels.

- **SIMPLE DESIGN** means equipment can be easily maintained by nursery personnel.
- **ALL MECHANICAL DESIGN** - provides repeatable accurate seed counts. Quick-change seed rate easy and fast. Operating chart provides calibration data.

- **DOUBLE DRILL** - The double drill with equally spaced seedlings assures maximum growing area for each seedling.
- **FREE FLOATING INDIVIDUAL ROW UNITS** follow bed contour.

- **Uniform furrows assure accurate seed placement and depth.** Remember fractions of an inch variation in bed height will disengage the opener and/or causing skipping of the packer on rigid frame units.
- **Assures consistent seed drop distance** so placement variation is minimized.
- **UNIFORM PACKING** is optimized by adjustable spring balance system.
- **OPERATOR** can optimize opening shoe and press wheel pressure to the needs of the nursery.
